Subject: Denver, Colorado is the perfect candidate for the second Satellite Office

Dear Commissioner,

I am an Intellectual Property Paralegal at Avaya Inc., in northern Colorado. I would like to submit my support in favor of opening a Satellite Office of the USPTO in Denver, Colorado, or in the northern Colorado area. Denver has abundant, affordable real estate, many Universities and technical schools out of which will come the next generation's great innovators. In addition, we already have many IP attorneys and patent agents working in the Denver/Boulder area, as well as in the surrounding states, who could utilize the Satellite Office. In addition, new Patent Examiners would be readily available for employment in the USPTO's Satellite Office.

In addition, the Denver area is a wonderful place to live and work. We have so much to offer USPTO employees and their families and the weather is great!

I wholeheartedly support the opening of the next Satellite Office in the Northern Colorado area!

Best Regards,

Kimberly C. Croft
